EDUCATION

MBA – Information Technology

Lovely Professional University, Jalandhar, Punjab
2023

BCA – Bachelor of Computer Applications

Panjab University, Chandigarh
2017

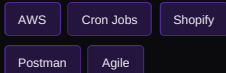

CERTIFICATIONS

- Certified Professional in PHP Programming – CS Infotech, Chandigarh (2018)

CORE STRENGTHS

- MVC architecture & clean code design
- RESTful API design & integration
- Database design & query optimization
- Auth & role-based access control
- Payment gateway & API integrations

TOOLS & PLATFORMS

Mukesh Kumar

FULL-STACK DEVELOPER | PHP / LARAVEL · MERN · PYTHON / DJANGO

PROFESSIONAL SUMMARY

Results-driven Full-Stack Developer with 5+ years of experience architecting secure, scalable web applications and RESTful APIs across PHP, Laravel, CodeIgniter, Python/Django, and modern JavaScript frameworks. Proven track record delivering end-to-end platforms — from insurance aggregation systems to B2B e-commerce marketplaces — spanning database architecture, third-party API integration, payment gateways, and admin dashboards. Adept at translating business requirements into high-performance backend systems, optimizing MySQL/PostgreSQL databases, and collaborating cross-functionally with front-end, UI/UX, and product teams to ship reliable software on time.

PROFESSIONAL EXPERIENCE

Laravel & Python Developer

Apr 2024 – Dec 2025

Seoily Technologies · Mohali, Punjab

- Developed and maintained dynamic, high-traffic web applications using the Laravel framework, ensuring reliability and maintainability.
- Built and secured RESTful APIs powering core backend business logic for production systems.
- Improved application performance and database efficiency through query optimization and code refactoring.
- Implemented role-based access control (RBAC) and secure data-handling practices to safeguard sensitive information.
- Proactively expanded skill set into Python and Django to support the team's backend framework diversification.

CodeIgniter & Laravel Developer

Jul 2022 – Dec 2023

Digitrix Infotech · Chandigarh

- Designed and built scalable web applications using Laravel and CodeIgniter, driving consistent MVC architecture across projects.
- Engineered RESTful APIs that powered both web and mobile client applications.
- Optimized backend logic and database schemas, improving system performance and long-term scalability.
- Designed and tuned MySQL database structures, including indexing strategies for faster query execution.
- Integrated third-party APIs and payment gateways, and partnered closely with front-end teams to deliver seamless, end-to-end product experiences.

Shopify Developer

Jul 2021 – Apr 2022

Gig Soft Pro · Mohali, Punjab

- Built and customized engaging Shopify storefronts designed to increase online revenue and conversion.
- Served as a subject-matter expert across the Shopify e-commerce platform, from theming to app configuration.
- Integrated Shopify Apps, marketing tools, and platform APIs to extend storefront functionality.
- Ran regular debugging and QA cycles to keep storefronts fast, stable, and performant.

PHP Developer

Jun 2019 – Jan 2021

CM Solutionz · Mohali, Punjab

- Analyzed website and application requirements, translating business needs into technical specifications.
- Wrote clean, efficient back-end PHP code and reusable modules to support product growth.
- Developed back-end portals backed by optimized database structures, and resolved application and code-level issues to maintain system stability.

KEY PROJECTS

First Hale – Insurance Aggregation Platform

Laravel · Django · MySQL · REST APIs · AWS · Cron Jobs · Payment Gateway

- Built and launched a subscription-based insurance aggregation platform for Uber drivers, unifying multiple third-party insurance APIs (Health, Life, RSA) into a single system.
- Architected the database for policy management, subscriptions, and partner services, and automated policy activation, renewals, and notifications via cron jobs.
- Delivered REST APIs and an admin dashboard with real-time monitoring and partner integration.

Kisan Yuva Club – Organic Farmer Discovery Platform

Laravel · Django · MySQL · REST APIs

- Developed a location-based platform connecting consumers directly with nearby organic farmers.
- Designed the database for farmer profiles, certifications, and registrations, and built REST APIs for onboarding and profile management.
- Implemented a farmer verification workflow and admin dashboard, and optimized backend performance for real-time listings.

Just Procure – B2B E-commerce & Procurement Platform

Laravel · MySQL · REST APIs

- Built a B2B e-commerce platform supporting both catalog ordering and custom procurement via Excel upload or manual entry.
- Developed bulk product upload with file processing and validation, plus custom negotiation workflows between buyers and sellers.
- Delivered REST APIs and an admin panel for order tracking, request approvals, and seller coordination.
